VENKAT SHIVAKUMAR

Software Developer

Chennai, Tamil Nadu | +91 6385357693 | Skvenkat63@gmail.com

LinkedIn: linkedin.com/in/skvenkat2005 | GitHub: github.com/Mr-Codervenkat | Portfolio: mr-codervenkat.github.io/Portfolio

PROFESSIONAL SUMMARY

Software Developer building full-stack web applications with Python, Django REST Framework, React.js, and MySQL. Experienced in secure API development, role-based access control, and database-driven features for healthcare, industrial, and hospitality software. Pursuing MCA at University of Madras.

SKILLS

Programming Languages: Python, SQL, JavaScript (ES6+)

Backend & APIs: Django, Django REST Framework (DRF), REST API Design, JWT Authentication, Flask

Databases: MySQL, Django ORM, Relational Database Design

Frontend: React.js, HTML5, CSS3, Responsive Design

Integration: ASTM Protocol, PLC Connectivity (Siemens, Mitsubishi, Allen Bradley)

Tools & Practices: Git, GitHub, Postman, Linux (Ubuntu), PuTTY, WinSCP, PyCharm, VS Code, Debugging, Troubleshooting, Technical Documentation

PROFESSIONAL EXPERIENCE

Software Developer - Vesoftometic Solution Pvt Ltd, Chennai **Mar 2026 – Present**

- Contributed to a Hospital Information Management System (HIMS) spanning four modules (patient records, billing, laboratory, pharmacy) using Django and MySQL.
- Engineered the MCI module with 25 secure REST API endpoints connecting the application to medical test analyzer machines.
- Implemented machine-to-application interfaces for 6 laboratory analyzers using the ASTM protocol and other connection strings.
- Optimized patient record retrieval, reducing fetch time from 800 ms to 300 ms (about 62% faster).
- Added a speech-to-text module to the doctor workbench, replacing manual typing with voice input.
- Resolved bugs and delivered features from business requirements in collaboration with stakeholders.

Software Developer Intern - Sarvesh Software Solutions **Sep 2025 – Dec 2025**

- Developed traceability software integrating real-time data from three PLC brands (Siemens, Mitsubishi, Allen Bradley) and CNC machines into a centralized database.
- Automated data-processing workflows with Python and SQL, and collaborated with a cross-functional team to troubleshoot automation issues.

PROJECTS

Full-Stack Hotel Management System

Python, Django REST Framework, React.js, MySQL, JWT

- Developed the platform as sole developer, with seven modules (rooms, reservations, billing, inventory, assets, reports, master settings) and a 35+ table MySQL database.
- Created the React.js frontend with a shared Axios client, role-based page access, and a mobile-responsive layout.
- Implemented REST APIs with JWT authentication and MySQL, plus a live dashboard with reports filtered by date and auto-refresh.
- Added GST-based billing with thermal receipt printing, shareable PDF bills, and ledger-based inventory using atomic transactions.

Speech-to-Text & Text-to-Speech Application

Python, Tkinter, OpenAI Whisper, pyttsx3

- Built a Tkinter desktop app that transcribes speech with OpenAI Whisper and converts text to speech offline with pyttsx3 (configurable voice and speed).

EDUCATION

Master of Computer Applications (MCA), University of Madras **2025 – 2027 (ongoing)**

Bachelor of Computer Applications (BCA), Pachaiyappa's College for Men, Chennai (77%) **2021 – 2024**

CERTIFICATIONS

Python Full Stack Development Training, Besant Technologies — Aug 2024 – Mar 2025

Claude Code in Action, Anthropic — Feb 2026
